

FROM UNIVERSITY TO THE WORKPLACE

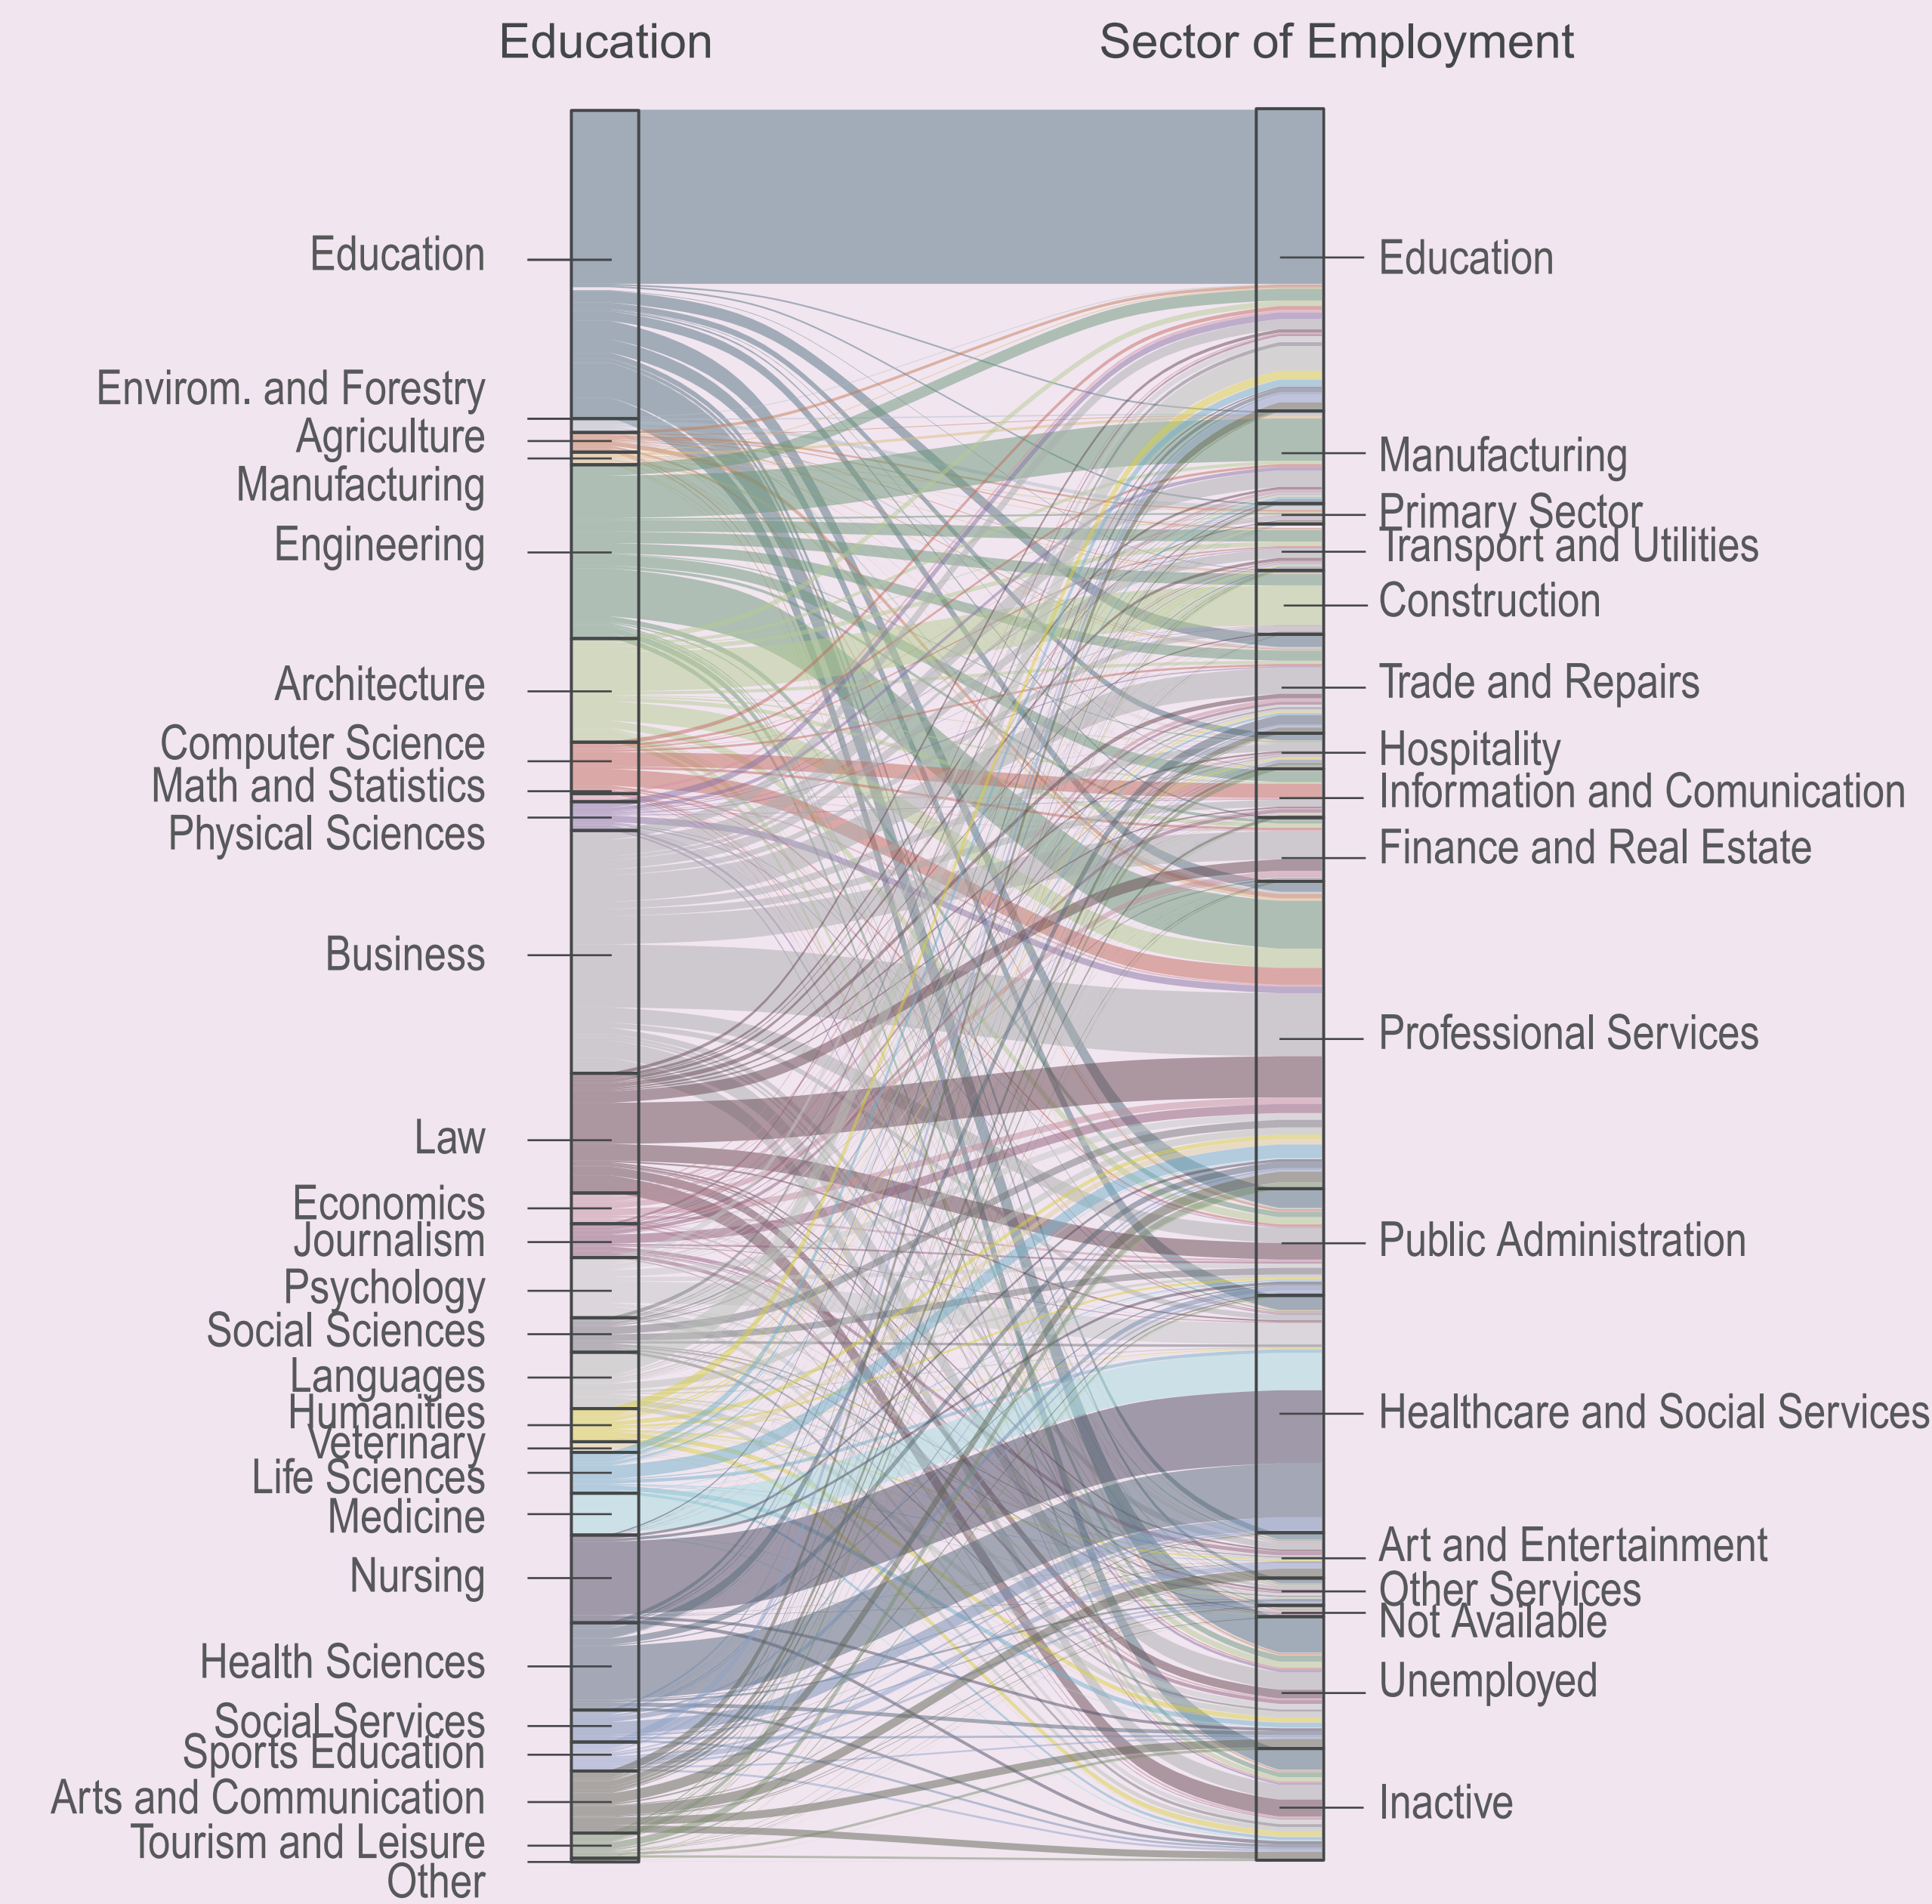

Main Findings by Field of Studies

By Francisco Franco Arenas
IST 719

The **Survey on the labor market insertion of university graduates** was conducted in 2019 to offer a detailed examination of the employment status and career paths of individuals who graduated in the 2014/2015 academic year from Universities in Spain. This study provides insights into the effectiveness of each field of study in preparing graduates for the labor market.

Educational Background and Sector of Employment

Business and Economics exhibit the most diverse sectors of employment, whereas Medicine and Nursing display the least diversity

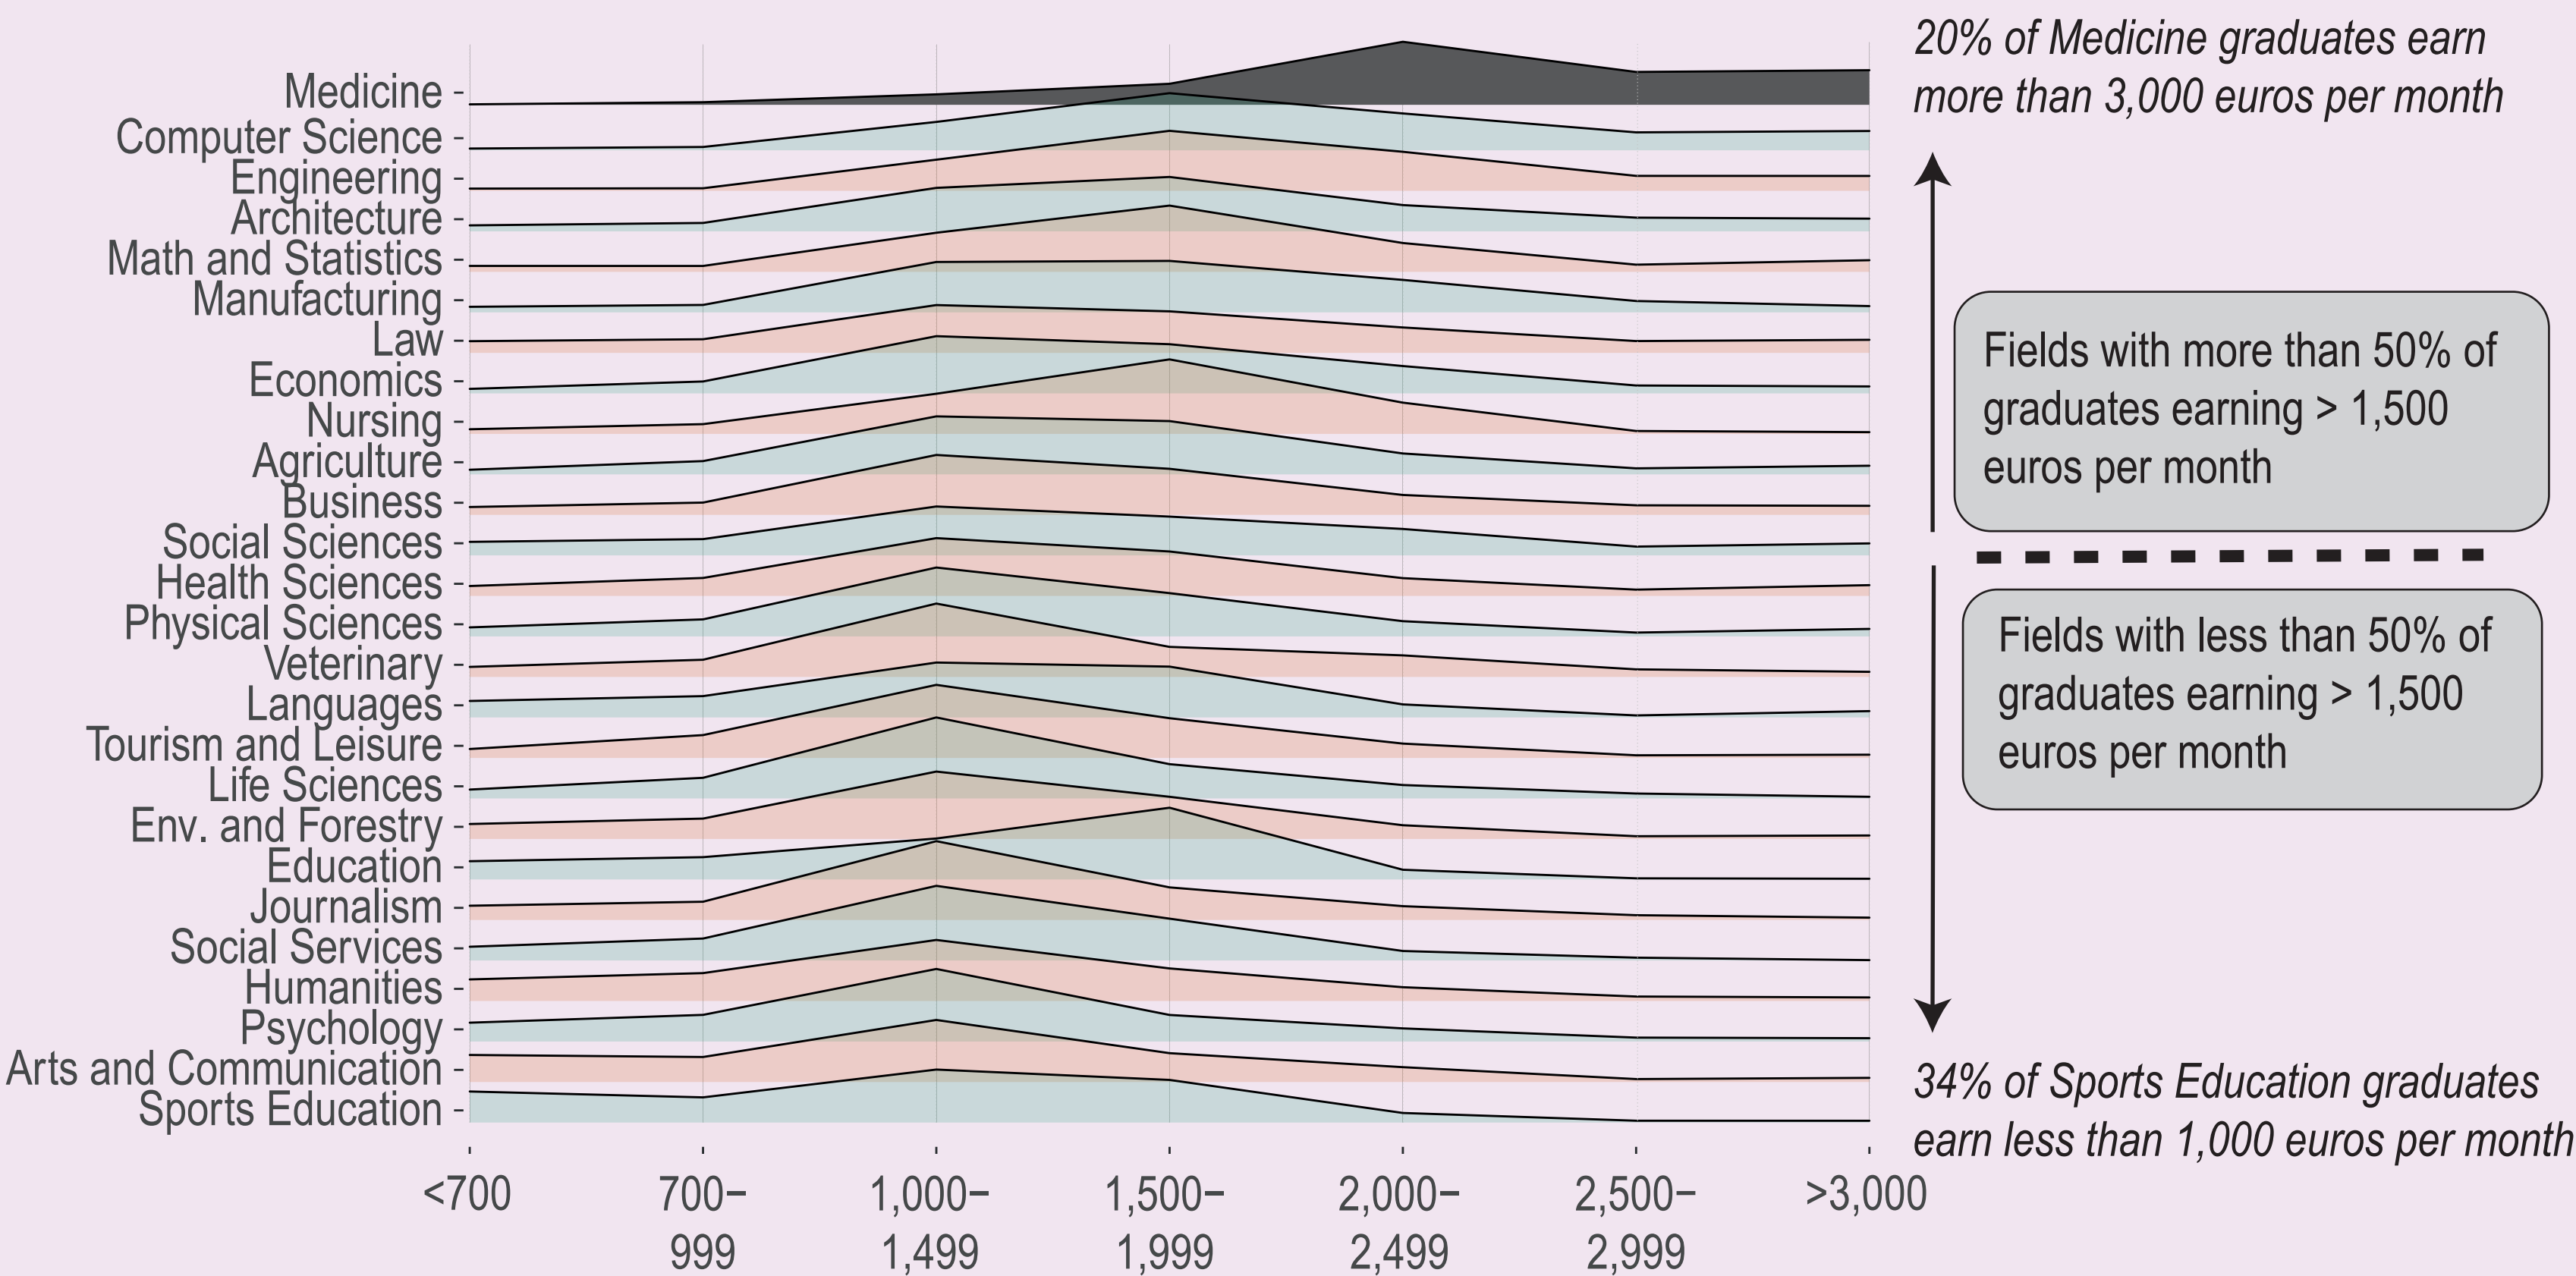

Highest and lowest rates of graduates in unemployment or inactive:

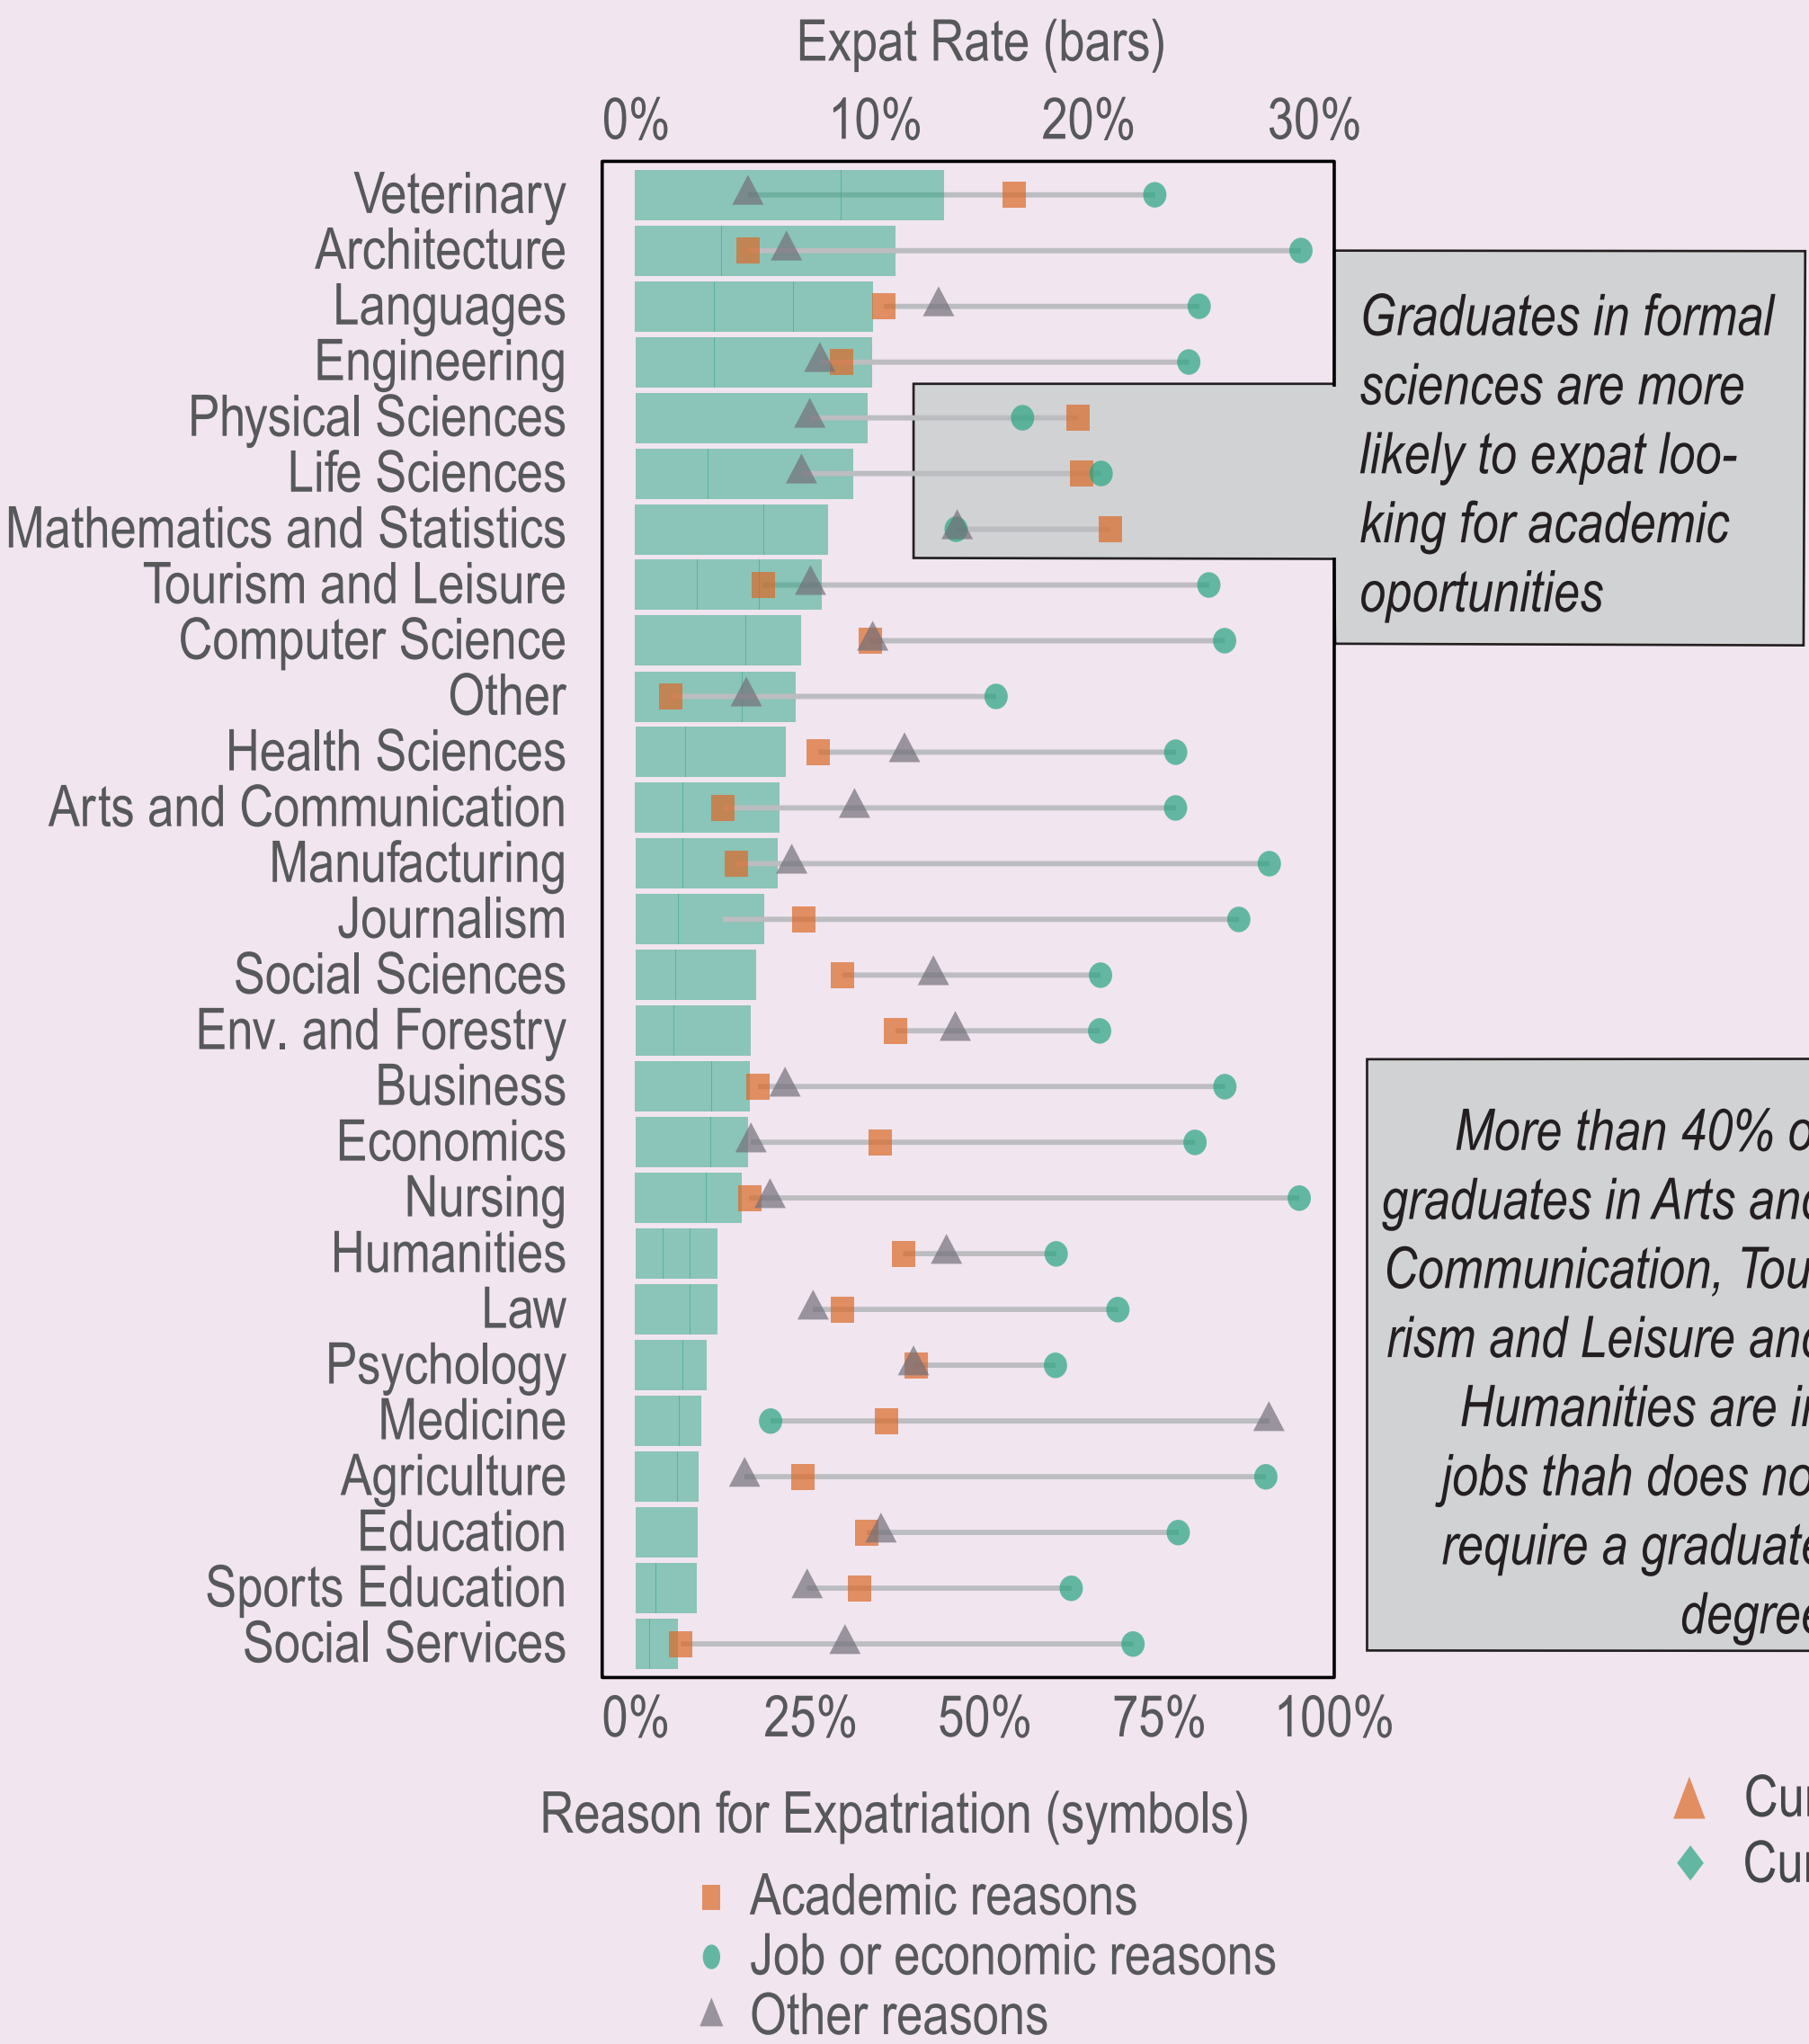

Humanities	28.8%	6.3%	Engineering
